Objective

Develop and evangelize world-class products that improve the lives of others and make a difference in the world.

Professional Experience

Apple, Inc. *Cupertino, California*

Intern, Summer 2012

Developed internal tools ranging from Python-powered web applications to iOS applications in order to assist with the testing of products on the Over the Air (Special Projects) team. Wrote software to parse large data sets and improve efficiency.

Domainr / nb.io *San Francisco, California*

Intern, Summer 2012

Rewrote my original Domainr Chrome Extension as the *official* Domainr Chrome Extension. Developed API wrappers in Python and JavaScript (Node.js). Evangelized Domainr via open source work, including a twitter bot and a Command-Line Interface. Implemented features and bug fixes on the website and iOS application.

Lift Worldwide, Inc. *San Francisco, California*

Engineer, February – December 2011

Coded in JavaScript (Backbone.js) and Ruby (Rails) as the first employee at this Obvious-funded startup. Took the Fall semester of 2011 off to continue working on Lift. Vetted product decisions with Ev Williams, Biz Stone and Jason Goldman. Participated in Fall 2011 LUXr program.

Savvis, Inc. *St. Louis, Missouri*

Linux Engineering Intern, November 2010 – February 2011

Wrote several internal PHP scripts to automate tasks and save employees up to 45 minutes a day. Worked alongside the system administrators at this enterprise-level hosting company. Clients include Coca-Cola, Proctor & Gamble and The Discovery Channel.

Engage Software, Inc. *St. Louis, Missouri*

Front-End Developer, August 2010 – November 2011

Bridged the gap between the Creative Director and Lead Architect while creating web applications built with DotNetNuke.

Intern, April – August 2010

Designed and Developed premium DotNetNuke themes.

Skills

Fluent with JavaScript (including Node.js), Ruby (Rails & Sinatra), HTML(5), CSS(3), SASS, Python, PHP and MySQL. Familiar with Adobe Creative Suite, Vim and Git. Experience with Objective-C, Cocoa, Django and WordPress.

Open Source Contributions

Domainr Chrome Extension, *Creator*

Developed the *official* Domai.nr Chrome Extension. Blogged about my process to over 90,000 readers.

Domainr API Wrappers, *Creator*

Developed Python and Node.js API wrappers for the Domai.nr service.

Domainr Twitter Bot & CLI, *Creator*

Developed a twitter bot that utilizes the Node.js API wrapper I wrote, along with a CLI to use the Python API wrapper.

Marky, *Co-Creator/Lead Developer*

Marky is an online markdown editor. She utilizes github gists as a file system, vim/emacs keyboard shortcuts, customizable color schemes and a distraction-free mode. Currently under development.

MoveTheWebForward.org, *Core Team*

MoveTheWebForward.org is a resource for those looking to give back to the web.

HTML5Please.com, *Core Team*

HTML5Please is a resource to help you use new features in HTML5 and CSS3 responsibly.

... and much more on github.com/connor.

Education

St. Louis University, *B.S. Computer Science*

Attended Aug 2009 – May 2012

On leave to pursue professional career.

Awards & Involvement

Boeing BOLD Scholarship, Zollinger Scholar, ITEN Scholar, Google Campus Rep, VP of Communications (Sigma Phi Epsilon), VP of Programming (Sigma Phi Epsilon), Griesedieck Hall Council President.
